

## Project Design Phase-II

### Solution Architecture

Date	23 October 2023
Team ID	592675
Project Name	ASL- Alphabet Image Recognition
Maximum Marks	4 Marks

### Solution Architecture:

Solution Architecture:

Solution architecture is a complex process - with many sub-processes - that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
